

# Xerceo Combines Learning Management with Microsoft Sharepoint

*“When I came into this position two LMS/LCMS products were in review. I chose Xerceo because its ease of use and support. No regrets there, the support has been fantastic.”*

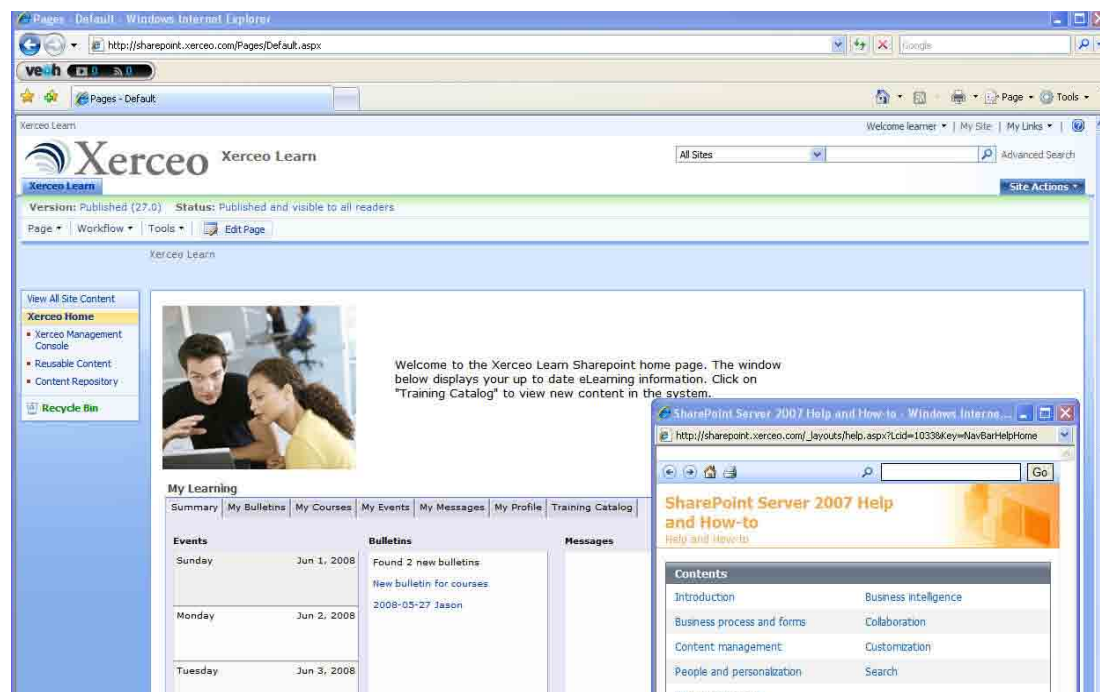

**Matt Bennett**  
Training Director  
Panasonic Avionics

Microsoft Office SharePoint Server 2007 has become one of the most widely deployed enterprise portal and content management systems available today. Sharepoint is an ideal central place where employees and team members can collaborate efficiently on organizational resources, find experts along with managing content and workflow.

Xerceo has taken this one step further by embedding Xerceo’s own enterprise portal based learning delivery, learning content management and knowledge management features into Sharepoint. This means Xerceo can store and recall all learning content as well as combine this with existing Sharepoint content. Xerceo effortlessly turns any Sharepoint content into a trackable, learning event to bring the most out of your team.

## Deployed behind your firewall or ours, available on-demand

- Works within MS Sharepoint 2007 for complete role based access to robust reporting, tracking and scheduling of any knowledge event.
- Turn any content, PDFs, HTML, video, etc. into a trackable/SCORM event that is within Sharepoint
- Installed within a few minutes, fully configured in a few days.
- Robust reporting, tracking and scheduling of any knowledge event.
- Subscribe to any third party content provider such as Skillsoft and combine into new learning experiences and learning paths of success for your team.

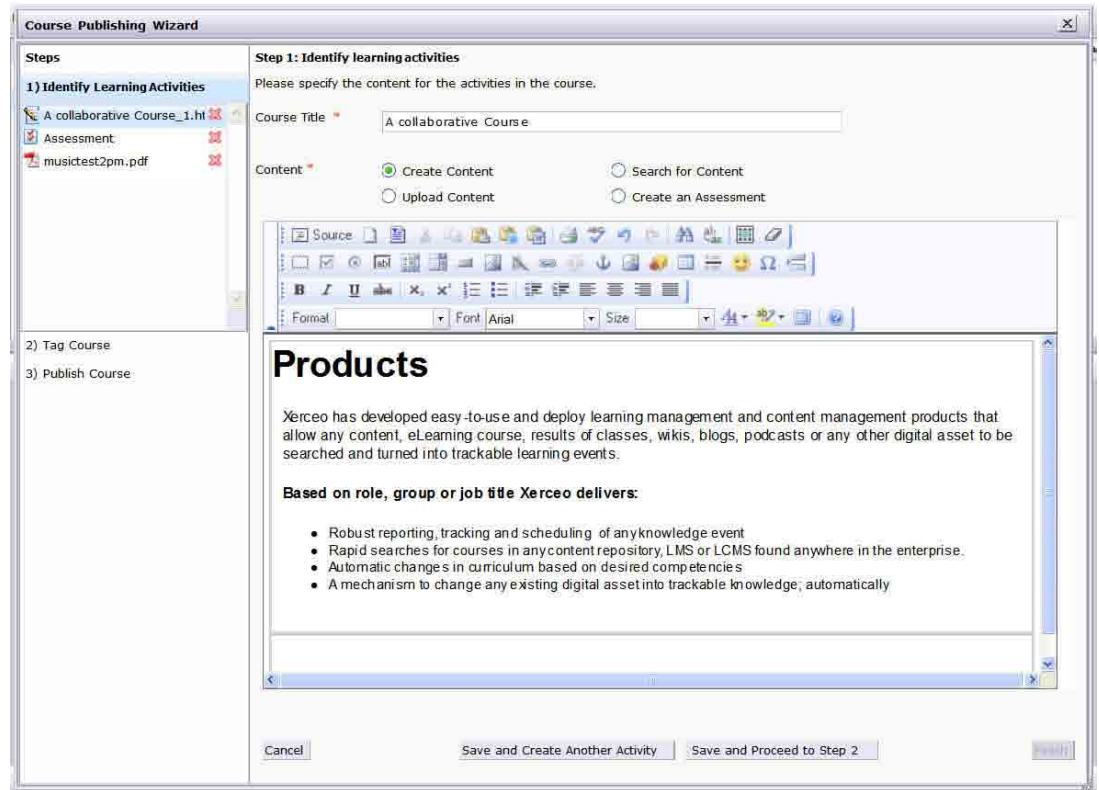

Simply select a Microsoft Sharepoint template, search for content, populate the template and publish. That’s it. No knowledge of SCORM or programming is required. Easily build SCORM 2004 compliant courses every time.

## Xerceo Collaborative Learning within Sharepoint

*“If Superior Customer Support were in the dictionary, you would find Xerceo’s Logo. No matter the request or question, Xerceo’s support team is there with an immediate answer, and that is no exaggeration.”*

If your organization already has Microsoft Sharepoint Server, why create yet another siloed system? Xerceo is designed to take advantage of all versioning, search, edit and publishing workflows found in Sharepoint and then effortlessly publish to a trackable learning event. While combining all this with Xerceo’s collaborative learning management and robust content tracking and subscriptions features. Automate your Sharepoint users so that any skills gap or competency can be automatically fulfilled based on their role, skills and goals.

How Xerceo is different.

Most robust and hosted Learning Management systems are designed as stand alone platforms that must go through extensive integration to work. Xerceo is different. By being built from inception on the leading Web 2.0 user interface and interaction standards Xerceo natively deploys onto any enterprise portal making for immediate tie in to your users, administrators, instructors and customers. Xerceo has all the benefits of a robust, integrated customized Learning Management system without all the deployment headaches and inflexibility of a customized solution.

## Xerceo Support

At Xerceo, we believe that providing superior services is just as important as providing a superior solution. Our customers have repeatedly stated that they selected us because of our in-depth e-Learning, enterprise portal, content management and Web Services expertise and stay with us because of our responsive and accurate support. Loyalty is like respect, you have to earn it and once you have, it takes hard work to keep it.
